SUMMARY

Full-Stack Developer with 6 months of expertise in building scalable web applications using **React.js**, **Node.js**, **MongoDB**, and **REST APIs**. Proficient in creating dynamic UIs with React and managing server-side logic with Node.js and Express.js. Skilled in MongoDB for database design and data management, and experienced in version control with **Git** and **GitHub**. Strong in API integration, asynchronous JavaScript, and server authentication.

WORK EXPERIENCE

MERN Developer

June 2024 - Present

- Developed dynamic, responsive web applications using **MERN stack (MongoDB, Express.js, React.js, and Node.js)**.
 - Designed and blended **RESTful APIs** to handle data flow between front-end and back-end, ensuring smooth user interactions.
 - Applied server-side logic using **Node.js** and **Express.js**, optimizing API performance and security.
 - Utilized **MongoDB** for database design, querying, and indexing, including complex aggregation pipelines.
 - Managed version control, code collaboration, and deployment using **Git** and **GitHub**.
-

TECHNICAL SKILLS

- MERN : **MongoDB, Express.js, React.js, Node.js**
 - NEXTjs : **Server Side Rendering**
 - MUI : **Material UI**
 - DSA : **Data Structures** and **Algorithms**
 - CORE JAVA PROGRAMMING : **OOPS**
 - GIT AND GITHUB: **Version control system**
-

SOFT SKILLS

- Collaboration
 - Adaptability
 - Creativity
-

EDUCATION

Bachelor of Technology

Minor in Information Technology • BBDNIIT • 7.9

Sep 2020 - May 2024

Intermediate

Minor in PCM • SRSVM • 76.8%

Feb 2019 - Feb 2020

PROJECTS

Cashknock.in - At coder world labs

July 2024 - Aug 2024

- Developed a **React.js-based** front-end for an ecommerce platform, where a user can sell gadgets such as smartphones and tablets
- Added **dynamic features** like product listings and search functionality, improving user navigation and ease of gadget sales.
- Implemented a responsive user interface with React Hooks (**useState, useEffect**) and reusable components for a seamless shopping experience.

Ozark - At coder world labs

Present

- Built a fully-functional informative website using the **MongoDB, Express.js, Next.js, Node.js**), delivering fast, responsive content to users.
- Integrated features in the **Admin panel** allowing admins to add, update, and delete website content dynamically, with real-time updates to the public-facing site.
- Secured the admin panel with **JWT-based authentication**, ensuring that only authorized users can manage website data.

CERTIFICATIONS

Redux and State Management

- Completed a comprehensive course focusing on managing application state in JavaScript, with an emphasis on React applications.
- Gained expertise in core **Redux** concepts including actions, reducers, and the Redux store for effective state management.
- Utilized **Redux Toolkit** to simplify Redux logic, optimize code efficiency, and reduce boilerplate during application development.

AI for React Developers

- Completed a specialized course focused on integrating **artificial intelligence** and **machine learning** into React applications.
- Gained a solid understanding of key AI concepts, algorithms, and machine learning techniques relevant to web development.
- Gained hands-on experience in implementing machine learning models using frameworks like **TensorFlow.js** or Brain.js within React projects.
